

SANITARY NAPKIN INCINERATOR

A Cleaner, Safer Way to Dispose of Used Sanitary Napkins

Used sanitary napkins can quickly become a source of bacteria and unpleasant odour when not disposed of properly. A sanitary napkin incinerator provides a safe and hygienic solution for responsible disposal.

GUIDELINES FOR USE

1. Do not place sanitary napkins inside plastic bags before putting them into the incinerator.
2. Wrap the used sanitary napkin in newspaper and place it inside the incinerator.
3. Never put plastic bags, plastic covers, or other unwanted plastic materials into the incinerator.
4. Use the incinerator only for its intended purpose—the safe disposal of used sanitary napkins.

Together, Let's Keep Our Spaces Clean, Hygienic & Environment-Friendly.
